

TECH-ARCH-1076

Architecture Reference Document

Department: Architecture

Author: William Chavez

Effective Date: 2022-10-22

1. Document Scope and Executive Summary

This Architecture Reference Document (ARD) outlines the guiding principles, standard operating procedures, and compliance requirements.

The scope of this ARD includes:

- * Definition of architectural roles and responsibilities
- * Standardized design and development processes
- * Compliance with relevant regulations and industry standards
- * Governance and operational procedures

This document applies to all employees and contractors working in the Architecture department.

2. Core Policies and Standard Operating Procedures

2.1 Design Principles

The following design principles will be applied to all architectural projects:

- * [Principle 1: Usability]
- * [Principle 2: Scalability]
- * [Principle 3: Security]
- * [Principle 4: Accessibility]

2.2 Development Life Cycle

The architecture development life cycle consists of the following stages:

1. Requirements Gathering
2. Design and Prototyping
3. Implementation and Testing
4. Deployment and Maintenance
5. Evaluation and Improvement

2.3 Change Management

All changes to existing architectures or designs must be documented, reviewed, and approved according to the following process:

1. Request for Change (RFC)
2. Review and Feedback
3. Approval and Implementation

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The Architecture department will conduct regular compliance audits to ensure adherence to this ARD. The audit schedule will be:

- * Quarterly review of design principles and development life cycle adherence
- * Semi-annual evaluation of change management process effectiveness
- * Annual assessment of overall compliance with this ARD

3.2 Penalties for Non-Compliance

Failure to comply with the guidelines outlined in this ARD may result in the following penalties:

- * Verbal warning for minor infractions
- * Written warning for moderate non-compliance
- * Disciplinary action (up to and including termination) for severe or repeated violations

3.3 Operational Governance

The Architecture department will maintain a governance structure to ensure effective management of architecture-related activities:

- * A senior architect responsible for overseeing the department's operations
- * Regular meetings with stakeholders and team members to discuss project progress, challenges, and best practices
- * A centralized knowledge management system for storing and sharing design documents, prototypes, and other relevant information
