

Architecture Reference Document: TECH-ARCH-1135

Metadata

- * Document ID: TECH-ARCH-1135
- * Department: Architecture
- * Author: Judy Wilson
- * Effective Date: 2021-07-01

1. Document Scope and Executive Summary

This Architecture Reference Document (ARD) outlines the policies, procedures, and best practices for the Architecture department.

The scope of this document includes:

- * Defining the architecture review process
- * Establishing guidelines for architectural design and documentation
- * Outlining the roles and responsibilities of architecture team members
- * Providing guidance on collaboration with cross-functional teams

This ARD is intended to serve as a single source of truth for architecture-related information, ensuring consistency and quality across the organization.

2. Core Policies and Standard Operating Procedures

2.1 Architecture Review Process

The architecture review process involves the following steps:

1. **Request Submission**: Architects submit their design proposals to the Architecture Review Committee (ARC) through a designated portal.
2. **Initial Screening**: The ARC performs an initial screening of submissions, ensuring they meet minimum requirements and align with organizational goals.
3. **Peer Review**: A peer review is conducted by the ARC members, who assess the design's feasibility, scalability, and alignment with architectural standards.
4. **Design Rationale**: Architects provide a clear design rationale, explaining the choices made during the design process.
5. **ARC Approval**: The ARC reviews and approves or rejects submissions based on their evaluation.

2.2 Architecture Design Guidelines

The following guidelines apply to all architecture designs:

- * Adhere to industry-standard design patterns and principles (e.g., SOLID, KISS)
- * Use a consistent naming convention for artifacts
- * Document architecture decisions using clear, concise language
- * Ensure design is scalable, maintainable, and secure

2.3 Collaboration with Cross-Functional Teams

Architects are expected to collaborate with cross-functional teams, including:

- * **Development**: Collaborate on implementation details and ensure alignment with architectural designs.
- * **Operations**: Work closely with operations teams to ensure architecture meets business needs and can be effectively deployed.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The Architecture department will monitor compliance with this ARD through:

- * Regular design reviews
- * Quarterly reporting on architectural standards adherence
- * Conducting audits as necessary

3.2 Penalties for Non-Compliance

Non-compliance with the policies outlined in this document may result in:

- * Rejection of design submissions
- * Mandatory rework to meet standards
- * Escalation to management for further action

3.3 Operational Governance

The Architecture department will maintain operational governance through:

- * Establishing a governance board to oversee architecture-related decisions
- * Defining clear roles and responsibilities within the architecture team
- * Ensuring transparency and accountability in architectural design and implementation
