Architecture Reference Document: TECH-ARCH-1936

1. Document Scope and Executive Summary

This document outlines the core policies, standard operating procedures (SOPs), and guidelines for the Architecture department.

- * Defining the roles and responsibilities within the Architecture team
- * Establishing best practices for architectural design, development, and maintenance
- * Outlining the process for reviewing and approving architectural designs
- * Describing the procedures for handling exceptions and edge cases

The purpose of this document is to ensure that all stakeholders within the organization have a clear understanding of the Architecture department's policies and procedures.

2. Core Policies and Standard Operating Procedures

2.1 Architectural Design Principles

The Architecture department follows a set of core design principles that govern the development of all architectural designs:

- * **Modularity:** Designs should be modular and scalable to accommodate future changes
- * **Reusability:** Components and modules should be reusable across multiple projects
- * **Maintainability:** Designs should be easy to maintain, update, and evolve over time
- * **Security:** Designs must prioritize security and minimize potential vulnerabilities

2.2 Design Review Process

The Architecture department has established a formal design review process to ensure that all architectural designs meet the company's standards and requirements.

1. **Initial Design Submission:** Architects submit their initial design proposals for review.
2. **Peer Review:** A peer reviewer evaluates the design proposal, providing feedback and suggestions.
3. **Design Refining:** The architect refines the design based on the peer reviewer's feedback.
4. **Final Approval:** The refined design is submitted to the Architecture team lead for final approval.

2.3 Change Management Process

The Architecture department has established a change management process to handle changes to architectural designs:

1. **Change Request Submission:** A request for change is submitted by an architect or project manager.
2. **Impact Assessment:** The Architecture team assesses the impact of the proposed change on existing designs and systems.
3. **Design Update:** The affected design(s) are updated to reflect the change.
4. **Verification:** The updated design(s) are verified to ensure compliance with company standards.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The Architecture department is responsible for monitoring compliance with these policies and procedures:

- * Regularly reviewing and auditing architectural designs
- * Conducting periodic reviews of the design review process
- * Identifying and addressing potential vulnerabilities or risks in designs

3.2 Penalties and Remediation

In the event that an architect fails to comply with these policies and procedures, the following penalties and remediation steps will be taken:

- * **Verbal Warning**: The first instance of non-compliance will result in a verbal warning
- * **Written Warning**: A second instance of non-compliance will result in a written warning
- * **Design Review Suspension**: Failure to comply with these policies and procedures may result in the suspension of design review responsibilities

3.3 Operational Governance

The Architecture department is responsible for governing its operations, including:

- * Maintaining accurate records of architectural designs and changes
- * Ensuring that all architects are trained on company standards and best practices
- * Providing ongoing support and resources to architects to ensure successful project outcomes
