

TECH-ARCH-1943: Architecture Reference Document

Document ID: TECH-ARCH-1943

Department: Architecture

Author: Scott Obrien

Effective Date: 2023-03-06

1. Document Scope and Executive Summary

This Architecture Reference Document (ARD) outlines the standards, guidelines, and best practices for the Architecture department.

The scope of this document includes:

- * Architectural principles and standards
- * Design patterns and guidelines
- * Decision-making processes and criteria
- * Communication protocols and collaboration best practices

2. Core Policies and Standard Operating Procedures

2.1. Architecture Principles

The following architectural principles will guide the design and development of all software systems within [Company Name]:

- * Separation of Concerns (SoC)
- * Single Responsibility Principle (SRP)
- * Don't Repeat Yourself (DRY)
- * KISS (Keep it Simple, Stupid)
- * YAGNI (You Ain't Gonna Need It)

2.2. Design Patterns and Guidelines

The following design patterns and guidelines will be applied to ensure consistency across projects:

- * Model-View-Controller (MVC) for web applications
- * Event-Driven Programming (EDP) for real-time systems
- * Microservices Architecture for distributed systems
- * RESTful APIs for API design

2.3. Decision-Making Processes and Criteria

Decision-making processes will follow the following criteria:

- * Alignment with business objectives
- * Compliance with industry standards and regulations
- * Technical feasibility and scalability
- * Cost-benefit analysis and ROI considerations

2.4. Communication Protocols and Collaboration Best Practices

Communication protocols and collaboration best practices include:

- * Regular project meetings and status updates

- * Asynchronous communication channels (e.g., email, messaging apps)
- * Agile methodologies for iterative development and continuous improvement
- * Clear documentation and knowledge sharing

3. Compliance Monitoring, Penalties, and Operational Governance

3.1. Compliance Monitoring

Compliance monitoring will be conducted through regular audits, code reviews, and testing to ensure adherence to architectural

3.2. Penalties and Corrective Actions

Non-compliance with architectural standards may result in penalties, including:

- * Re-work or re-architecture of non-compliant components
- * Additional training or education for team members
- * Project delays or budget adjustments

3.3. Operational Governance

Operational governance will be ensured through:

- * Clear roles and responsibilities for architects and developers
- * Defined processes for issue tracking, prioritization, and resolution
- * Continuous monitoring and improvement of architectural designs and practices
