

TECH-ARCH-2185: Architecture Reference Document

Department: Architecture

Author: Pamela Clark

Effective Date: 2021-10-14

1. Document Scope and Executive Summary

This document outlines the core policies, standard operating procedures, and compliance monitoring framework for the Architecture team.

The scope of this document includes:

- * Defining the roles and responsibilities of architecture team members
- * Establishing guidelines for architectural decision-making and communication
- * Outlining procedures for designing, developing, and testing architectural solutions
- * Specifying compliance monitoring and penalty frameworks for non-compliance

2. Core Policies and Standard Operating Procedures

2.1 Architecture Principles

The following principles guide the architecture team's design decisions:

- * Separation of Concerns: Ensure clear separation between concerns such as data storage, processing, and presentation
- * Modularity: Design components that are reusable, maintainable, and scalable
- * Scalability: Develop architectures that can handle increased traffic and user growth
- * Security: Prioritize security throughout the design process

2.2 Architecture Review and Approval Process

1. **Initial Design**: Architects submit a high-level design proposal for review by peers and stakeholders.
2. **Design Review**: A designated reviewer provides feedback and suggestions, ensuring alignment with company standards and best practices.
3. **Revision and Re-submission**: The architect revises the design based on feedback and re-submits it for approval.
4. **Final Approval**: The approved design is documented and implemented.

2.3 Architecture Change Management

1. **Request**: A change request is submitted to the architecture team, outlining the reason and impact of the proposed change.
2. **Assessment**: Architects assess the change's feasibility, cost, and potential risks.
3. **Design and Review**: The architect develops a revised design and submits it for review by peers and stakeholders.
4. **Implementation**: The approved change is implemented, with monitoring to ensure successful integration.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The architecture team will monitor compliance with this document through regular:

- * Architecture design reviews
- * Code reviews
- * Testing and quality assurance processes

3.2 Penalties for Non-Compliance

In the event of non-compliance, penalties may include:

- * Re-work or re-design of affected components
- * Training or mentorship to ensure understanding of architecture principles and procedures
- * Temporary or permanent suspension of architectural responsibilities

3.3 Operational Governance

The architecture team will maintain regular meetings to discuss:

- * Architecture design decisions
- * Project updates and status
- * Compliance monitoring results and areas for improvement

By following this document, the Architecture department aims to ensure the delivery of high-quality architectural solutions that m
