

Architecture Reference Document: TECH-ARCH-2867

Metadata

Document ID: TECH-ARCH-2867

Department: Architecture

Author: Morgan Burke

Effective Date: 2025-01-27

1. Document Scope and Executive Summary

This Architecture Reference Document (ARD) outlines the policies, procedures, and guidelines for the Architecture department and its interactions with other departments.

The scope of this document includes:

- * Definition of architecture-related terms and concepts
- * Standard operating procedures (SOPs) for architecture development, implementation, and maintenance
- * Guidelines for collaborating with other departments and stakeholders
- * Compliance monitoring and penalty structures

2. Core Policies and Standard Operating Procedures

2.1 Architecture Development Life Cycle

The architecture development life cycle consists of the following stages:

1. **Initial Investigation**: Identify business needs and requirements.
2. **Conceptual Design**: Develop high-level design concepts.
3. **Detailed Design**: Create detailed design specifications.
4. **Implementation**: Implement the designed solution.
5. **Testing and Quality Assurance**: Verify that the implemented solution meets requirements.
6. **Deployment**: Deploy the solution to production.

2.2 Architecture Review and Approval

All architectural designs and changes must undergo a review and approval process before implementation. The review process involves the following steps:

1. **Peer Review**: Review by peers within the Architecture department.
2. **Technical Review**: Review by technical experts from other departments (e.g., Engineering, IT).
3. **Business Review**: Review by business stakeholders and leaders.

2.3 Architecture Change Management

All changes to existing architectures must be managed through a formal change management process. This includes:

1. **Change Request**: Submit a change request to the Architecture department.
2. **Assessment**: Assess the impact of the proposed change on existing architectures.
3. **Approval**: Obtain approval from relevant stakeholders and leaders.

2.4 Collaboration with Other Departments

The Architecture department will collaborate with other departments, including:

1. **Engineering**: Collaborate on technical implementation details.
2. **IT**: Collaborate on infrastructure and system integration.
3. **Business**: Collaborate on business requirements and stakeholder needs.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The Architecture department will monitor compliance with this ARD through:

1. ****Regular Audits****: Conduct regular audits to ensure adherence to policies and procedures.
2. ****Incident Reporting****: Report incidents or non-compliance issues to management.

3.2 Penalties for Non-Compliance

In the event of non-compliance, penalties may include:

1. ****Warning****: Issue a warning to the individual or team responsible.
2. ****Re-training****: Require re-training on relevant policies and procedures.
3. ****Disciplinary Action****: Take disciplinary action up to and including termination.

3.3 Operational Governance

The Architecture department will ensure operational governance through:

1. ****Process Documentation****: Maintain accurate documentation of processes and procedures.
2. ****Training and Development****: Provide training and development opportunities for team members.
3. ****Performance Metrics****: Establish performance metrics to measure success.
