

1. Document Scope and Executive Summary

This reference document outlines the core policies, standard operating procedures (SOPs), and operational governance framework.

2. Core Policies and Standard Operating Procedures

Project Management

- * All architecture projects must be initiated through the approved process: "Architecture Project Initiation Request" (APIR).
- * The APIR will outline project scope, goals, objectives, timelines, and resource allocation.
- * Architects are responsible for maintaining accurate project records, including project plans, status reports, and meeting minutes.

Communication

- * Effective communication is crucial to successful project delivery. Architects must maintain regular contact with stakeholders, team members, and clients.
- * The Architecture department will utilize collaboration tools (e.g., Asana, Trello) to track progress, assign tasks, and share information.
- * Architects are expected to respond promptly to emails, phone calls, and instant messaging requests within a 2-hour window.

Collaboration

- * Architects must work closely with cross-functional teams, including engineering, product management, and design. Collaboration is essential for delivering high-quality solutions.
- * The Architecture department will maintain a centralized knowledge base (e.g., Confluence) to share best practices, guidelines, and project information.

Compliance

- * Architects are responsible for ensuring compliance with relevant industry standards, regulations, and company policies. This includes staying up-to-date on changes and implementing necessary controls.
- * The Architecture department will conduct regular audits to ensure compliance with these standards and procedures.

3. Compliance Monitoring, Penalties, and Operational Governance

Compliance Monitoring

- * The Architecture department will conduct quarterly reviews to monitor project progress, identify potential risks, and address any compliance issues.
- * Architects are expected to maintain accurate records of design decisions, code changes, and testing results to facilitate compliance monitoring.

Penalties for Non-Compliance

- * Failure to comply with architecture standards and procedures may result in:
 - + Verbal warning
 - + Written warning
 - + Suspension of project privileges
 - + Termination of employment (in extreme cases)

Operational Governance

- * The Architecture department will maintain a governance framework to ensure effective decision-making, risk management, and compliance.
- * Architects are expected to adhere to this framework when making design decisions or implementing changes.

This document outlines the core policies and procedures for the Architecture department. It is essential that all architects and stakeholders understand and follow these guidelines.
