

TECH-ARCH-3094: Architecture Reference Document

Department: Architecture

Author: Karen Harris

Effective Date: 2022-11-22

Architecture Reference Document: TECH-ARCH-3094

1. Document Scope and Executive Summary

This document outlines the core policies, standard operating procedures, and guidelines for the Architecture department at [Company Name].

The scope of this document includes:

- * Defining architectural principles and standards
- * Establishing processes for design, development, and testing
- * Outlining roles and responsibilities within the Architecture department
- * Providing guidelines for compliance with company policies and industry regulations

This document is intended for all stakeholders involved in architecture-related activities at [Company Name], including architects, engineers, and project managers.

2. Core Policies and Standard Operating Procedures

2.1 Architectural Principles

The Architecture department adheres to the following core architectural principles:

- * Separation of Concerns (SoC): Each system component should have a single, well-defined responsibility.
- * Don't Repeat Yourself (DRY): Avoid duplicating code or functionality whenever possible.
- * Keep it Simple, Stupid (KISS): Favor simplicity and ease of maintenance over complexity.

2.2 Design Standards

The Architecture department follows these design standards:

- * Use established industry-standard frameworks and tools for architecture and design
- * Adhere to company-specific naming conventions and coding guidelines
- * Utilize version control systems for all architectural designs and code

2.3 Development and Testing Procedures

The Architecture department follows these development and testing procedures:

- * Use Agile methodologies for iterative development and continuous improvement
- * Conduct thorough testing and validation of all architectural designs and code
- * Collaborate with cross-functional teams to ensure seamless integration

2.4 Roles and Responsibilities

The following roles are responsible for architecture-related activities at [Company Name]:

- * Architecture Team: Responsible for developing, reviewing, and maintaining architectural designs and standards.
- * Development Teams: Responsible for implementing architectural designs and adhering to design standards.
- * Project Managers: Responsible for overseeing project execution and ensuring compliance with architectural principles and standards.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The Architecture department will:

- * Conduct regular audits and reviews of architectural designs and code
- * Identify and address any non-compliance issues or concerns
- * Provide training and guidance to teams on architecture-related topics

3.2 Penalties for Non-Compliance

In the event of non-compliance with architectural principles, standards, or procedures, the following penalties may apply:

- * Warning: Verbal warning issued by the Architecture department.
- * Reprieve: Temporary suspension of architecture-related activities until compliance is achieved.
- * Termination: Permanent termination of employment at [Company Name] due to repeated non-compliance.

3.3 Operational Governance

The Architecture department will:

- * Establish and maintain a centralized repository for architectural designs, standards, and guidelines
- * Provide regular updates and training on architecture-related topics
- * Foster collaboration and communication among teams and stakeholders

By adhering to the policies, procedures, and guidelines outlined in this document, the Architecture department at [Company Name]
