

TECH-ARCH-3143: Architecture Reference Document

Document Metadata

* **Document ID:** TECH-ARCH-3143

* **Department:** Architecture

* **Author:** Daniel Young

* **Effective Date:** 2021-08-08

1. Document Scope and Executive Summary

This reference document outlines the core policies, standard operating procedures (SOPs), and guidelines for the Architecture department.

The scope of this document includes:

- * High-level overview of the Architecture department's role and responsibilities
- * Core policies governing architecture decisions and practices
- * Standard operating procedures for common architecture-related tasks and activities
- * Guidelines for collaboration with cross-functional teams

2. Core Policies and Standard Operating Procedures

2.1. Architecture Decision-Making Process

The Architecture department will follow a structured decision-making process for all architectural decisions, which includes:

- * Identifying business requirements and stakeholder needs
- * Conducting feasibility studies and risk assessments
- * Developing and reviewing conceptual designs
- * Presenting design options to stakeholders and obtaining feedback
- * Finalizing the chosen architecture and implementing changes

2.2. Design Standards and Guidelines

The Architecture department will adhere to [Company Name]'s design standards and guidelines, which include:

- * Visual identity and branding
- * User interface (UI) and user experience (UX) principles
- * Data modeling and database schema design
- * API design and integration best practices

2.3. Code Quality and Testing Standards

The Architecture department will ensure that all code meets [Company Name]'s quality and testing standards, which include:

- * Coding conventions and style guidelines
- * Unit testing and integration testing frameworks
- * Automated testing and CI/CD pipelines
- * Peer review and code analysis processes

2.4. Change Management Process

The Architecture department will follow a structured change management process for all changes to the architecture, which include:

- * Identifying the need for change and defining the problem statement
- * Developing and reviewing proposed solutions
- * Presenting options to stakeholders and obtaining feedback
- * Finalizing the chosen solution and implementing changes

2.5. Incident Response and Recovery Process

The Architecture department will have a documented incident response and recovery process in place, which includes:

- * Identifying and reporting incidents
- * Assessing severity and impact
- * Developing and executing recovery plans
- * Conducting post-incident reviews and lessons learned exercises

3. Compliance Monitoring, Penalties, and Operational Governance

3.1. Compliance Monitoring

The Architecture department will monitor compliance with this document's policies and procedures through regular audits, peer reviews, and self-assessments.

3.2. Penalties for Non-Compliance

Non-compliance with this document's policies and procedures may result in penalties, including:

- * Verbal warnings
- * Written warnings
- * Suspension or termination of architecture-related activities
- * Mandatory training or education programs

3.3. Operational Governance

The Architecture department will maintain a governance framework that includes:

- * Architecture steering committee
- * Architecture review board
- * Design authority
- * Change management process owners

This document is effective as of the Effective Date listed above and may be updated or revised at any time without notice.
