

TECH-ARCH-3784: Architecture Reference Document

Department: Architecture

Author: Laura Wiley

Effective Date: 2025-09-03

Architecture Reference Document: TECH-ARCH-3784

1. Document Scope and Executive Summary

This document outlines the core policies, standard operating procedures (SOPs), and operational governance for the Architecture department.

Scope

This document applies to all employees, contractors, and third-party vendors working within the Architecture department. It covers the following areas:

Executive Summary

The Architecture department is responsible for designing and implementing solutions that meet business requirements while ensuring security, scalability, and reliability.

2. Core Policies and Standard Operating Procedures

Policy: Architecture Design Principles

- * Principle 1: Scalability - Designs should be scalable to meet future business needs.
- * Principle 2: Security - Designs should prioritize security and minimize vulnerabilities.
- * Principle 3: Reliability - Designs should ensure high availability and minimize downtime.
- * Principle 4: Maintainability - Designs should facilitate easy maintenance, updates, and bug fixes.

Procedure: Architecture Design Process

1. **Requirements Gathering**: Architects will gather business requirements through stakeholder interviews, documentation reviews, and analysis.
2. **Design Development**: Architects will develop architectural designs using approved design tools and methodologies.
3. **Review and Approval**: Designs will be reviewed and approved by the Architecture Governance Committee (AGC) or design review board.
4. **Implementation and Deployment**: Approved designs will be implemented and deployed according to established guidelines.

Procedure: Change Management

1. **Request Submission**: Architects will submit change requests to the AGC, providing a detailed description of the proposed change, its impact, and justification.
2. **Review and Approval**: The AGC will review and approve or reject change requests based on business impact, technical feasibility, and resource availability.
3. **Implementation and Deployment**: Approved changes will be implemented and deployed according to established guidelines.

3. Compliance Monitoring, Penalties, and Operational Governance

Compliance Monitoring

- * The Architecture department will conduct regular audits to ensure adherence to this document's policies and procedures.
- * Architects are responsible for maintaining accurate records of their design development, reviews, and approvals.

Penalties

- * Failure to comply with this document's policies and procedures may result in:
 - + Warning
 - + Suspension or revocation of architecture privileges
 - + Termination of employment or contract

Operational Governance

- * The Architecture Governance Committee (AGC) will oversee the implementation and enforcement of this document.
- * The AGC will consist of representatives from various departments, including Architecture, Engineering, IT, and Project Management.

By following this document's guidelines and procedures, the Architecture department can ensure that architectural designs meet
