

1. Document Scope and Executive Summary

This Architecture Reference Document (ARD) outlines the core policies, standard operating procedures (SOPs), and guidelines

The purpose of this document is to establish a common understanding among stakeholders of the Architecture department's role

2. Core Policies and Standard Operating Procedures

2.1. Design Principles

The Architecture department follows these design principles when creating enterprise architecture solutions:

- * **Separation of Concerns**: Components should be designed with a single responsibility to ease maintenance and scalability.
- * **Simplification**: Solutions should be designed to minimize complexity, ensuring ease of use and understanding.
- * **Reusability**: Reusable components promote efficiency, reduce development time, and enhance maintainability.

2.2. Development Guidelines

The Architecture department follows these development guidelines when creating enterprise architecture solutions:

- * **Code Quality**: All code must adhere to [Company Name]'s coding standards, ensuring consistency, readability, and maintainability.
- * **Testing**: Thorough testing is required for all developed components to ensure quality, reliability, and scalability.

2.3. Change Management

The Architecture department follows these change management procedures when introducing changes to existing solutions:

- * **Request**: All changes must be submitted through the company's change request process, ensuring transparency, accountability, and documentation.
- * **Review**: Changes will be reviewed by the Architecture team and other relevant stakeholders to ensure alignment with business goals and standards.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1. Compliance Monitoring

The Architecture department is responsible for monitoring compliance with this ARD and reporting any non-compliance issues to management.

3.2. Penalties

Failure to comply with this ARD may result in:

- * **Warning**: Verbal or written warning issued by management.
- * **Reprimand**: Written reprimand issued by management, which may be placed in an employee's personnel file.
- * **Disciplinary Action**: Disciplinary action, up to and including termination of employment.

3.3. Operational Governance

The Architecture department is responsible for the day-to-day governance of enterprise architecture solutions. This includes:

- * **Issue Tracking**:

The team will maintain a centralized issue tracking system to ensure timely resolution of defects and issues.

- * **Release Management**:

The team will manage software releases, ensuring that changes are properly tested and documented.

By following this Architecture Reference Document, the Architecture department aims to deliver high-quality enterprise architecture solutions.
