

TECH-ARCH-4496: Architecture Reference Document

Metadata

* **Document ID**: TECH-ARCH-4496
* **Department**: Architecture
* **Author**: Benjamin Arnold
* **Effective Date**: 2020-08-22

1. Document Scope and Executive Summary

This Architecture Reference Document (ARD) outlines the core policies, standard operating procedures, and guidelines for the Architecture department.

The scope of this document includes:

- * Defining the Architecture department's role and responsibilities
- * Establishing core policies and procedures for architecture design, development, and maintenance
- * Outlining compliance monitoring and penalty structures
- * Providing guidance on operational governance and risk management

2. Core Policies and Standard Operating Procedures

2.1. Architecture Design Principles

The Architecture department shall adhere to the following design principles:

- * Modularity: Designs shall be modular, allowing for easy maintenance and updates.
- * Scalability: Designs shall be scalable, accommodating growth and changing business requirements.
- * Reusability: Designs shall prioritize reusability, reducing duplication of effort and promoting consistency.

2.2. Architecture Development Process

The architecture development process shall involve the following stages:

1. Requirements gathering
2. Conceptual design
3. High-level design
4. Detailed design
5. Implementation and testing
6. Deployment and maintenance

2.3. Change Management

The Architecture department shall implement a change management process to ensure that all changes are properly documented and approved.

- * Changes shall be requested through a formal request process.
- * Changes shall be reviewed by the Architecture Review Board (ARB) for impact on existing systems and compliance with architecture standards.
- * Approved changes shall be implemented and tested before deployment.

2.4. Documentation and Knowledge Management

The Architecture department shall maintain accurate and up-to-date documentation of all architectures, including:

- * Design documents
- * Technical specifications
- * Implementation plans
- * Testing procedures

Knowledge management processes shall include:

- * Collaborative tools for sharing knowledge and expertise
- * Regular training and mentoring programs
- * Continuous learning and professional development opportunities

3. Compliance Monitoring, Penalties, and Operational Governance

3.1. Compliance Monitoring

The Architecture department shall monitor compliance with architectural guidelines and standards through regular audits and reviews.

- * Audits shall be conducted quarterly to ensure adherence to design principles, development processes, and documentation requirements.
- * Non-compliance shall result in corrective action plans being developed and implemented.

3.2. Penalties for Non-Compliance

The Architecture department shall impose the following penalties for non-compliance:

- * Minor infractions: Verbal warning or minor retraining
- * Moderate infractions: Written warning or temporary suspension of privileges
- * Major infractions: Formal disciplinary action, including termination

3.3. Operational Governance

The Architecture department shall operate in accordance with the following governance structure:

- * The Architecture Review Board (ARB) shall oversee architectural decisions and ensure compliance with guidelines.
- * The department manager shall be responsible for operational management and resource allocation.
- * The company's IT leadership team shall provide strategic guidance and oversight.

By following this Architecture Reference Document, the Architecture department at [Company Name] shall maintain a high level of
