Architecture Reference Document: TECH-ARCH-4785

1. Document Scope and Executive Summary

This Architecture Reference Document outlines the fundamental principles, policies, and standard operating procedures governing

Purpose

The purpose of this document is to establish a unified architecture reference framework that guides the creation of new systems

Scope

This document applies to all Architecture department personnel, as well as other stakeholders involved in the design, development

2. Core Policies and Standard Operating Procedures

2.1 Design Principles

The organization adheres to the following core design principles:

- * Separation of Concerns (SoC): logical separation of concerns into distinct components or services
- * Single Responsibility Principle (SRP): each component or service has a single responsibility
- * Don't Repeat Yourself (DRY): avoid duplicating code or logic
- * KISS: keep it simple and straightforward

2.2 Architecture Design Process

The architecture design process involves the following stages:

1. Requirements Gathering: gathering business requirements, user stories, and technical specifications
2. Conceptual Design: creating high-level architectural concepts and designs
3. Detailed Design: refining and detailing the design, including component selection and configuration
4. Implementation: implementing the designed solution
5. Testing and Verification: testing and verifying the implemented solution against requirements and design specifications

2.3 Architecture Review and Approval Process

The architecture review and approval process involves the following stages:

1. Initial Design Review: initial review of the design by the Architecture team and relevant stakeholders
2. Feedback and Revisions: incorporating feedback and making revisions as needed
3. Final Review and Approval: final review and approval by the Architecture team and senior management

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The organization will monitor compliance with architectural standards and policies through regular audits, reviews, and assessments.

3.2 Penalties for Non-Compliance

Failure to comply with architectural standards and policies may result in the following penalties:

- * Re-work of non-compliant design or implementation
- * Suspension or termination of personnel responsible for non-compliance
- * Allocation of additional resources to rectify non-compliance

3.3 Operational Governance

The organization will maintain a centralized architecture governance structure, comprising the following roles:

- * Architecture Governance Committee: overseeing architectural standards and policies
- * Architecture Review Board (ARB): reviewing and approving architectural designs
- * Chief Architect: providing strategic guidance and oversight for architectural initiatives
