2. Core Policies and Standard Operating Procedures

2.1 Architecture Framework

The [Company Name] Architecture Framework outlines the principles, patterns, and standards for designing solutions that meet

- * Enterprise architecture vision and roadmap
- * Solution architecture guidelines and templates
- * Technical standards and best practices
- * Change management and governance procedures

2.2 Design and Development Process

The design and development process for architectures at [Company Name] follows a structured approach, including:

- * Requirements gathering and analysis
- * Conceptual design and prototypes
- * Detailed design and implementation
- * Testing and validation
- * Deployment and maintenance

2.3 Change Management and Governance

Changes to existing architectures or the introduction of new ones must be managed through a formal change management proc

- * Request for change (RFC) submission and review
- * Impact analysis and risk assessment
- * Approval and implementation planning
- * Post-implementation review and evaluation

2.4 Communication and Collaboration

Architects at [Company Name] are expected to collaborate with cross-functional teams and stakeholders to ensure successful p

- * Participating in regular architecture meetings and working groups

- * Providing design guidance and support to development teams
- * Communicating changes and impacts to stakeholders and management

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The Architecture department will monitor compliance with organizational standards and regulatory expectations through:

- * Regular reviews of architecture designs and implementations
- * Audits and assessments of architecture processes and practices
- * Incident reporting and analysis

3.2 Penalties for Non-Compliance

Non-compliance with organizational standards and regulatory expectations may result in penalties, including:

- * Re-work or re-design of non-compliant architectures
- * Suspension or revocation of architect privileges
- * Disciplinary action up to and including termination

3.3 Operational Governance

The Architecture department will operate under the following governance structure:

- * Architecture Steering Committee (ASC) for strategic architecture direction and decision-making
- * Architecture Working Group (AWG) for tactical architecture guidance and support
- * Architecture Office of Record (AOR) for maintaining architecture documentation and records
