

TECH-ARCH-4938: Architecture Reference Document

Document Metadata

Document ID: TECH-ARCH-4938

Department: Architecture

Author: Jacob Olson

Effective Date: 2022-03-08

1. Document Scope and Executive Summary

This document outlines the core policies, standard operating procedures, and guidelines for the Architecture department at [Company Name].

The purpose of this document is to provide a comprehensive reference guide for architects, developers, and other stakeholders.

2. Core Policies and Standard Operating Procedures

2.1 Design Principles

- * The department adheres to a service-oriented architecture (SOA) approach for all software development projects.
- * All designs must adhere to the SOLID principles (Single Responsibility Principle, Open/Closed Principle, Liskov Substitution Principle, Interface Segregation Principle, and Dependency Inversion Principle).
- * Designs must prioritize scalability, security, and maintainability.

2.2 Development Process

- * The Agile development methodology is used for all software development projects.
- * Sprints are scheduled every two weeks, with bi-weekly status updates and retrospectives.
- * Code reviews are mandatory for all code changes, performed by peers or designated reviewers.
- * All code must comply with the company's coding standards.

2.3 Change Management

- * Any changes to existing software systems or infrastructure require a formal change request process.
- * The change request process includes risk assessment, impact analysis, and approval from relevant stakeholders.
- * Changes must be documented in the issue tracking system (JIRA) and updated as necessary.

2.4 Documentation and Knowledge Sharing

- * All architectural designs and decisions are documented in the company's knowledge management platform (Confluence).
- * Architects are responsible for maintaining accurate and up-to-date documentation of their work.
- * The department participates in regular brown-bag sessions and workshops to share knowledge and best practices.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance

- * The Architecture department is responsible for ensuring compliance with company policies, industry standards, and regulatory requirements.
- * Architects must maintain accurate records of their work, including design decisions, code changes, and testing results.

3.2 Penalties

- * Failure to comply with company policies or procedures may result in penalties, including:
 - + Verbal warnings
 - + Written warnings
 - + Performance improvement plans
 - + Termination of employment

3.3 Operational Governance

- * The Architecture department is responsible for monitoring and reporting on its own performance metrics (e.g., cycle time, lead
- * Architects are expected to participate in regular retrospectives and continuous improvement activities.
- * The department will maintain a dashboard to track key performance indicators (KPIs) and provide real-time feedback.
