

# ARCHITECTURE REFERENCE DOCUMENT: TECH-ARCH-5126

## Department: Architecture

## Author: Dale Lawson

## Effective Date: 2021-06-25

### ### Document Scope and Executive Summary

This reference document outlines the core policies and standard operating procedures (SOPs) for the Architecture department.

The scope of this document includes:

- \* Defining the Architecture department's role and responsibilities
- \* Outlining core policies and SOPs for architecture development, deployment, and maintenance
- \* Establishing guidelines for compliance monitoring, penalties, and operational governance

### ### 1. Core Policies and Standard Operating Procedures

#### #### 1.1 Architecture Development Life Cycle

The Architecture department follows a structured development life cycle for all architectural solutions:

1. Requirements gathering: Gather requirements from stakeholders and define the scope of the project.
2. Design: Develop a comprehensive design document outlining the architecture, components, and interfaces.
3. Implementation: Implement the designed solution using approved tools and technologies.
4. Testing: Conduct thorough testing to ensure the solution meets the defined requirements.
5. Deployment: Deploy the solution to production environments.
6. Maintenance: Perform regular maintenance and updates to ensure the solution remains effective and efficient.

#### #### 1.2 Architecture Review Board (ARB)

The ARB is responsible for reviewing and approving all architectural designs, ensuring alignment with organizational goals, standards, and best practices.

#### #### 1.3 Change Management

The Architecture department follows a change management process to ensure that any changes to existing architectures are properly managed and approved.

1. Request submission: Submit requests for changes to existing architectures.
2. Assessment: Evaluate the impact of the proposed changes on the architecture and stakeholders.
3. Approval: Obtain approval from the ARB or other designated authorities.
4. Implementation: Implement the approved changes.

### ### 2. Compliance Monitoring, Penalties, and Operational Governance

#### #### 2.1 Compliance Monitoring

The Architecture department is responsible for monitoring compliance with organizational policies, standards, and best practices.

- \* Regular audits to ensure adherence to established guidelines
- \* Incident reporting and tracking
- \* Root cause analysis and corrective actions

#### #### 2.2 Penalties

Non-compliance with architectural guidelines may result in penalties, including but not limited to:

- \* Revisions to the architecture design
- \* Additional training or certifications for architects involved
- \* Temporary suspension of architect privileges

#### #### 2.3 Operational Governance

The Architecture department operates under the following governance structure:

- \* The ARB oversees all architectural designs and changes.
- \* The Chief Architect is responsible for overall strategy, direction, and decision-making.
- \* The Architecture team manages day-to-day operations, including design, implementation, testing, and maintenance.

### ### 3. Edge Cases and Exceptions

#### #### 3.1 Special Circumstances

In rare cases where a specific architectural solution may not meet the standard policies or SOPs, special circumstances may be

- \* Exceptional approval from the ARB or Chief Architect
- \* Temporary waivers for specific projects or initiatives

#### #### 3.2 Contingency Planning

The Architecture department develops contingency plans to address unexpected events or changes in organizational priorities:

- \* Develop alternative architectures and fallback scenarios
- \* Establish communication channels with stakeholders and teams involved

This document serves as a comprehensive guide for the Architecture department, outlining core policies, SOPs, compliance mo
