

ARCHITECTURE REFERENCE DOCUMENT: TECH-ARCH-5144

Department: Architecture

Author: Kelsey Peterson

Effective Date: 2024-12-14

Document Scope and Executive Summary

This reference document outlines the core policies, standard operating procedures (SOPs), and compliance requirements for the

The Architecture department is responsible for designing and implementing enterprise-wide solutions that meet business needs

2. Core Policies and Standard Operating Procedures

2.1 Design Principles

* The Architecture department will adhere to the following design principles:

- + Scalability: Designs should be scalable to accommodate growth and changing business needs.
- + Security: Designs should prioritize security and ensure confidentiality, integrity, and availability of data.
- + Maintainability: Designs should be maintainable, with clear documentation and easy troubleshooting.

2.2 Architecture Review and Approval Process

* The Architecture department will conduct regular reviews and approvals for all architecture designs, including:

- + Initial design submission
- + Revised design submissions (based on feedback)
- + Final approval prior to implementation

2.3 Change Management Process

* The Architecture department will adhere to the following change management process:

1. Identify: Identify changes or issues that require architectural review.
2. Assess: Assess the impact of the proposed change or issue.
3. Plan: Develop a plan for implementing the change or resolving the issue.
4. Execute: Execute the planned changes or resolve the issue.
5. Verify: Verify the outcome of the implemented changes or resolved issue.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

* The Architecture department will regularly monitor compliance with architectural standards, best practices, and regulatory requirements.

* A quarterly review process will ensure that all architecture designs meet the required standards and compliance requirements.

3.2 Penalties for Non-Compliance

* Failure to comply with architectural standards, best practices, or regulatory requirements may result in:

- + Written warnings
- + Mandatory rework or redesign
- + Suspension of architectural responsibilities
- + Termination of employment (in extreme cases)

3.3 Operational Governance

- * The Architecture department will maintain accurate and up-to-date records of all architecture designs, changes, and approvals
- * A designated architect will be responsible for ensuring compliance with this document and reporting any non-compliance issues

By following the procedures outlined in this reference document, the Architecture department will ensure consistent application of
