

TECH-ARCH-5439: Architecture Reference Document

Metadata:

Document ID: TECH-ARCH-5439

Department: Architecture

Author: Anne Bowman

Effective Date: 2026-05-27

1. Document Scope and Executive Summary

This Architecture Reference Document (ARD) outlines the core policies, standard operating procedures, and best practices for the organization's architecture.

This ARD applies to all architecture-related activities within the organization, including project planning, design, development, testing, and deployment.

2. Core Policies and Standard Operating Procedures

2.1 Architecture Standards and Guidelines

- * The organization shall adhere to established architecture standards and guidelines for all projects, including but not limited to:
 - + Technology stack and infrastructure
 - + Data modeling and storage
 - + User interface and user experience (UI/UX)
 - + Security and compliance requirements
- * Architects shall ensure that all designs are reviewed and approved by relevant stakeholders before implementation.

2.2 Project Planning and Management

- * The organization shall follow a standardized project planning and management process, including:
 - + Project initiation and scope definition
 - + Resource allocation and scheduling
 - + Risk management and issue resolution
 - + Status reporting and monitoring
- * Architects shall collaborate with project managers to ensure that architecture solutions align with business objectives and project requirements.

2.3 Design and Development

- * The organization shall follow a standardized design and development process, including:
 - + Requirements gathering and analysis
 - + Design concept and prototype development
 - + Testing and quality assurance
 - + Deployment and maintenance planning
- * Architects shall ensure that all designs are thoroughly tested and validated before deployment.

2.4 Change Management

- * The organization shall have a standardized change management process in place, including:
 - + Request for change (RFC) submission and review
 - + Impact analysis and risk assessment
 - + Change implementation and testing
 - + Post-implementation review and evaluation
- * Architects shall collaborate with stakeholders to ensure that changes are properly assessed and implemented.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

- * The organization shall monitor compliance with this ARD through regular audits and reviews.
- * Architects shall maintain accurate records of architecture designs, development, and deployment activities.

3.2 Penalties

- * Failure to comply with this ARD may result in penalties, including but not limited to:
 - + Verbal warnings
 - + Written warnings
 - + Disciplinary action
 - + Termination of employment or contract
- * Architects shall be held accountable for any non-compliance issues identified during audits and reviews.

3.3 Operational Governance

- * The organization shall establish a governance structure to oversee architecture-related activities, including:
 - + Architecture review board (ARB) for design and development approval
 - + Change management committee (CMC) for change request evaluation and implementation
 - + Architecture steering committee (ASC) for strategic direction and decision-making
- * Architects shall collaborate with stakeholders to ensure that architecture solutions align with business objectives and operational requirements.

By following this Architecture Reference Document, the organization can ensure that its architecture solutions are designed, developed, and deployed in a manner that aligns with business objectives and operational requirements.
