1. Document Scope and Executive Summary

This reference document outlines the architecture department's policies, procedures, and guidelines for designing, developing, and maintaining architectural solutions.

The executive summary highlights the importance of adhering to these policies and procedures to ensure the successful delivery of architectural projects.

2. Core Policies and Standard Operating Procedures

2.1 Project Initiation

- * All architectural projects must be initiated through the official request process, which includes submitting a project proposal to the architecture department.
- * The project proposal must include a clear description of the project's objectives, scope, timeline, and budget.

2.2 Requirements Gathering

- * All architectural projects require thorough requirements gathering and documentation, including user stories, use cases, and functional requirements.
- * The architecture department will maintain a centralized repository for storing and tracking requirements.

2.3 Design Creation

- * All architectural designs must adhere to the organization's technology stack and standards.
- * The design creation process includes creating high-level and detailed design documents, as well as developing prototypes and mockups.

2.4 Implementation and Testing

- * All architectural implementations must be tested thoroughly before deployment.
- * The architecture department will maintain a testing framework for ensuring consistent testing practices across projects.

2.5 Deployment and Maintenance

- * All architectural solutions must be deployed to production environments in accordance with the organization's change management process.
- * The architecture department will maintain a centralized repository for storing and tracking architectural solution documentation.

2.6 Retirement and Decommissioning

- * All architectural solutions must be retired and decommissioned according to the organization's asset management policy.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

- * The architecture department will conduct regular compliance monitoring to ensure adherence to policies and procedures.
- * Non-compliance may result in penalties, as outlined below.

3.2 Penalties

- * First-time non-compliance: Verbal warning and mandatory attendance at a compliance training session.
- * Second-time non-compliance: Written warning and mandatory attendance at a compliance training session.
- * Third-time non-compliance: Suspension or termination of architectural work.

3.3 Operational Governance

- * The architecture department will maintain a centralized governance framework for managing architectural projects and ensuring compliance.
- * The governance framework includes roles, responsibilities, and decision-making processes.

Note: This document is subject to change as necessary. All changes must be approved by the Architecture Steering Committee.
