

TECH-ARCH-5665

Document ID: TECH-ARCH-5665

Department: Architecture

Author: Angela Chambers

Effective Date: 2023-02-28

1. Document Scope and Executive Summary

This Architecture Reference Document outlines the policies, procedures, and guidelines governing the design, development, and deployment of architectures within the organization.

The scope of this document is to provide a comprehensive framework for ensuring that architectural designs meet business requirements and adhere to industry best practices.

2. Core Policies and Standard Operating Procedures

2.1 Architecture Design Principles

* [Company Name] adheres to the following architecture design principles:

- + Modularity: Designs should be modular, allowing for easy maintenance, updates, and scalability.
- + Flexibility: Architectures should accommodate changing business requirements and technical advancements.
- + Scalability: Designs should scale horizontally and vertically to meet growing demands.
- + Security: Architectures should prioritize security, incorporating measures to prevent unauthorized access, data breaches, and other threats.

2.2 Architecture Development Process

1. **Requirements Gathering**: Define project goals, identify stakeholders, and gather functional and non-functional requirements.
2. **Design and Prototyping**: Create high-level design documents, prototypes, and proof-of-concepts to validate architectural decisions.
3. **Implementation and Testing**: Develop and test architectural components, ensuring compliance with standards and best practices.
4. **Deployment and Maintenance**: Deploy architectures into production environments, monitor performance, and perform regular updates and maintenance.

2.3 Change Management

- * All changes to existing architectures or introduction of new architectures must be approved through the change management process.
- * Changes will be assessed against architecture design principles and standards to ensure compliance.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

- * The Architecture department will monitor and audit architectural designs for compliance with company policies, regulatory requirements, and industry standards.
- * All non-compliant architectures must be corrected or replaced within a specified timeframe.

3.2 Penalties

- * Failure to comply with architecture design principles, standards, and procedures may result in:
 - + Verbal warnings
 - + Written warnings
 - + Suspension of architectural development privileges
 - + Termination of employment (in extreme cases)

3.3 Operational Governance

- * The Architecture department will maintain a centralized repository of approved architectures, standards, and best practices.
- * The department will provide training and support to ensure employees understand and comply with architecture policies and procedures.
