

TECH-ARCH-5786: Architecture Reference Document

Metadata

- * Document ID: TECH-ARCH-5786
- * Department: Architecture
- * Author: Joseph Perez
- * Effective Date: 2025-05-12

1. Document Scope and Executive Summary

This Architecture Reference Document (ARD) outlines the standard operating procedures, core policies, and governance framework for the architecture department.

The scope of this document includes:

- * Defining the architecture principles and standards
- * Outlining the process for designing and developing architectures
- * Establishing guidelines for architectural decision-making
- * Describing the roles and responsibilities of architects and other stakeholders

By following the procedures outlined in this document, we aim to ensure that our architectures are well-designed, scalable, secure, and aligned with business goals.

2. Core Policies and Standard Operating Procedures

2.1 Architecture Principles

- * Principle 1: Align with Business Goals
 - + Architects will prioritize designs that align with the company's overall strategy and goals.
- * Principle 2: Keep it Simple and Stupid (KISS)
 - + Architects will strive to create simple, intuitive, and easy-to-use architectures.
- * Principle 3: Scalability and Flexibility
 - + Architects will design architectures that can scale horizontally and vertically, and are flexible enough to adapt to changing business requirements.

2.2 Design Process

1. **Requirements Gathering**: Architects will work with stakeholders to gather requirements for the architecture.
2. **Design Development**: Architects will develop a detailed design based on the gathered requirements.
3. **Review and Feedback**: Architects will review their design and provide feedback to stakeholders.
4. **Iteration and Refinement**: Architects will refine their design based on stakeholder feedback.

2.3 Architecture Governance

- * **Architecture Review Committee (ARC)**: A committee composed of architects, designers, and other stakeholders will review and approve all architecture designs.
- * **Change Management**: Any changes to the architecture will be reviewed and approved by the ARC before implementation.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

- * The Architecture department will monitor compliance with the policies and procedures outlined in this document.
- * Non-compliance may result in penalties or disciplinary action.

3.2 Penalties

* **Warning**: A written warning will be issued to the architect for minor non-compliances.

* **Reprimand**: A verbal reprimand will be given to the architect for moderate non-compliances.

* **Disciplinary Action**: The architect may face disciplinary action, including suspension or termination, for severe non-compliances.

3.3 Operational Governance

* The Architecture department will maintain accurate and up-to-date records of architectures, designs, and decision-making processes.

* The department will provide regular reports to management on architecture-related activities and compliance status.

By following the procedures outlined in this document, we aim to ensure that our architectures are well-designed, scalable, secure, and compliant with relevant regulations and standards.
