

TECH-ARCH-5832: Architecture Reference Document

Document Metadata

- * Document ID: TECH-ARCH-5832
- * Department: Architecture
- * Author: Jim Miller
- * Effective Date: 2021-09-10

1. Document Scope and Executive Summary

This document outlines the scope, policies, procedures, and governance framework for the Architecture department. The purpose of this document is to provide a clear and concise overview of the department's goals, objectives, and standards.

The executive summary highlights the key objectives and scope of this document:

- * Define the core principles and policies governing architecture development
- * Establish standard operating procedures (SOPs) for architecture design, review, and approval
- * Outline compliance monitoring, penalties, and operational governance to ensure adherence to these standards

2. Core Policies and Standard Operating Procedures

2.1 Architecture Design Principles

The Architecture department follows the following principles when designing architectures:

- * **Modularity**: Divide complex systems into smaller, independent modules for easier maintenance and scalability
- * **Scalability**: Design architectures to accommodate growing demands and changing requirements
- * **Flexibility**: Allow for changes in technology, business needs, or market conditions without significant rework
- * **Security**: Prioritize security considerations throughout the design process

2.2 Architecture Review and Approval Process

The architecture review and approval process involves the following steps:

1. **Architecture Design Submission**: The architect submits a detailed design document to the Architecture Review Committee (ARC).
2. **Initial Review**: ARC reviews the design for completeness, feasibility, and alignment with company policies.
3. **Design Revisions**: The architect revises the design based on feedback from ARC.
4. **Final Review and Approval**: ARC conducts a final review and approves the architecture design.

2.3 Architecture Change Management Process

The architecture change management process involves the following steps:

1. **Change Request Submission**: A stakeholder submits a change request to modify an existing architecture.
2. **Impact Analysis**: The architect assesses the potential impact of the proposed changes on the overall system and stakeholders.
3. **Design Revisions**: The architect revises the design to accommodate the requested changes.
4. **Review and Approval**: ARC reviews and approves the revised design.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The Architecture department will monitor compliance with these policies and procedures through regular audits, architecture design reviews, and stakeholder feedback.

3.2 Penalties for Non-Compliance

In the event of non-compliance, penalties may include:

- * **Warning***: A formal warning to the architect or team member
- * **Design Revisions***: The requirement to revise the design to meet policy requirements
- * **Architecture Approval Delay***: A delay in approving the architecture until compliance issues are resolved

3.3 Operational Governance

The Architecture department will maintain a governance framework that includes:

- * **Architecture Committee***: A committee responsible for overseeing architecture development and ensuring compliance with p
- * **Architecture Stakeholder Management***: Regular engagement with stakeholders to ensure their needs are met and expectat
