

TECH-ARCH-6352: Architecture Reference Document

Document ID: TECH-ARCH-6352

Department: Architecture

Author: Daniel Bowman

Effective Date: 2023-05-08

1. Document Scope and Executive Summary

This document outlines the architecture reference guidelines for the Architecture department, providing a comprehensive framework for design and implementation.

2. Core Policies and Standard Operating Procedures

2.1 Architecture Design Principles

- * Separation of Concerns (SoC): Ensure clear separation between business logic, data storage, and presentation layers
- * Modularity: Encourage reusable, self-contained components to facilitate maintenance and updates
- * Scalability: Design systems to accommodate future growth and increased demands
- * Interoperability: Foster seamless integration with existing systems and technologies

2.2 Architecture Review Process (ARP)

1. Request for Architecture Review (RAR): Submit RAR form to initiate ARP process
2. Initial Review: Architecture team reviews request, provides feedback, and identifies potential issues
3. Revised Design Submission: Resubmit revised design addressing initial review comments
4. Final Review and Approval: Confirm final design meets organizational standards

2.3 Change Management Procedure (CMP)

1. Identify Change: Submit change request to the architecture team for evaluation
2. Assessment: Evaluate impact on existing systems, infrastructure, and architecture
3. Design Update: Develop updated design incorporating changes
4. Implementation: Execute approved changes, monitor, and report outcomes

2.4 Architecture Document Management

- * Version Control: Use version control system (VCS) to track and manage document revisions
- * Access Control: Restrict access to authorized personnel using role-based access controls (RBAC)
- * Archiving: Store previous versions of documents in a secure archive for historical reference

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

- * Regular Audits: Conduct regular architecture audits to ensure adherence to guidelines
- * Incident Reporting: Report incidents or non-compliance to the Architecture department for investigation and resolution

3.2 Penalties and Consequences

- * Non-Compliance: Failure to comply with architecture guidelines may result in delays, rework, or additional training
- * Repeated Offenses: Continued non-compliance may lead to disciplinary action or revocation of architectural authority

3.3 Operational Governance

* Escalation Process: Establish a clear escalation process for addressing architecture-related issues and concerns

* Communication Channels: Maintain open communication channels between the Architecture department, stakeholders, and project teams
