Architecture Reference Document: TECH-ARCH-7075

1. Document Scope and Executive Summary

This reference document outlines the core policies, standard operating procedures (SOPs), and operational governance for the .

The Architecture department is responsible for developing and maintaining the technical architecture of our products and services.

2. Core Policies and Standard Operating Procedures

2.1. Design Principles

- * The Architecture department will adhere to the following design principles:
 - + Scalability: All architectural designs must be scalable to meet future demands.
 - + Flexibility: Designs should allow for flexibility in adapting to changing requirements.
 - + Security: Security is a top priority, and all designs must ensure robust security features.

2.2. Architecture Development Process

- * The architecture development process consists of the following stages:
 1. Requirements gathering
 2. Design creation
 3. Review and feedback
 4. Implementation and testing
 5. Deployment and maintenance

2.3. Change Management

- * Any changes to existing architectures or designs must be thoroughly reviewed and approved by the Architecture department before implementation.
- * Changes must also comply with relevant policies, standards, and regulations.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1. Compliance Monitoring

- * The Architecture department will conduct regular compliance checks to ensure adherence to relevant policies, standards, and regulations.
- * Non-compliance may result in penalties or disciplinary action, as outlined in the company's disciplinary procedures.

3.2. Penalties

- * Failure to comply with architecture development process or design principles may result in:
 - + Verbal warnings
 - + Written warnings
 - + Suspension of architectural privileges
 - + Termination of employment (in extreme cases)

3.3. Operational Governance

- * The Architecture department will maintain accurate records and documentation of all architectural designs, development processes, and project outcomes.
- * The department will also conduct regular audits to ensure compliance with company policies and standards.

This document outlines the core policies, SOPs, and operational governance for the Architecture department at [Company Name].
