

TECH-ARCH-7121: Architecture Reference Document

Department: Architecture

Author: Gregory Chaney

Effective Date: 2020-12-09

1. Document Scope and Executive Summary

This Architecture Reference Document outlines the core policies, standard operating procedures, and compliance requirements

The scope of this document includes:

- * Defining the Architecture department's role and responsibilities
- * Outlining the core policies and standard operating procedures for architecture development and maintenance
- * Establishing compliance monitoring, penalties, and operational governance

2. Core Policies and Standard Operating Procedures

2.1 Architecture Development Process

The Architecture development process consists of the following stages:

- * Requirements gathering: Collecting and analyzing business requirements from stakeholders
- * Design: Creating high-level architecture designs based on gathered requirements
- * Implementation: Developing and testing software components according to design specifications
- * Maintenance: Updating, debugging, and refactoring existing software components as needed

2.2 Architecture Review Board (ARB)

The ARB is responsible for reviewing and approving all architecture designs, ensuring alignment with company standards and b

- * Membership: The ARB consists of representatives from the Architecture department, Engineering, and Management.
- * Responsibilities:
 - + Reviewing architecture design documents
 - + Providing feedback on design quality, feasibility, and compliance with company standards
 - + Approving or rejecting design submissions

2.3 Code Quality and Documentation

The Architecture department is responsible for ensuring code quality and documentation meet the following standards:

- * Code organization and structure: Adhering to standardized directory structures and naming conventions
- * Code readability and maintainability: Using clean, concise, and well-structured code
- * Documentation: Providing accurate, up-to-date, and comprehensive documentation for software components

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The Architecture department will conduct regular compliance monitoring to ensure adherence to established policies and proced

- * Frequency: Quarterly audits and ad-hoc reviews as needed
- * Scope: Reviewing architecture designs, code quality, and documentation for compliance with company standards

3.2 Penalties

In the event of non-compliance, penalties may be imposed as follows:

- * Minor deviations: Warning and corrective action plan
- * Major deviations: Suspension or termination of project involvement

3.3 Operational Governance

The Architecture department will maintain operational governance through regular meetings, reports, and metrics.

- * Frequency: Bi-weekly status updates and monthly progress reports
- * Scope: Tracking project milestones, risks, and issues; monitoring resource allocation and utilization
