Architecture Reference Document: TECH-ARCH-7258

1. Document Scope and Executive Summary

This document serves as the reference guide for the Architecture department, outlining core policies, standard operating procedures, and best practices.

The scope of this document includes:

- * Defining architecture principles and standards
- * Establishing SOPs for architecture planning, design, and implementation
- * Outlining compliance monitoring processes and penalties for non-compliance
- * Providing guidelines for operational governance and decision-making

This document applies to all Architecture department members, project managers, and stakeholders involved in architectural-related activities.

2. Core Policies and Standard Operating Procedures

2.1. Architecture Principles

The organization's architecture principles are based on the following core values:

- * Scalability: Designs should be scalable to meet growing demands
- * Flexibility: Solutions should be adaptable to changing requirements
- * Security: Architectures must ensure robust security controls
- * Interoperability: Systems and components should integrate seamlessly
- * Maintainability: Designs should facilitate easy maintenance and updates

2.2. Architecture Design Process

2.2.1. Requirements Gathering

- * Identify business needs and objectives
- * Define functional and non-functional requirements
- * Document user stories and acceptance criteria

2.2.2. High-Level Design

- * Develop high-level architecture diagrams and descriptions
- * Define system boundaries, components, and interfaces
- * Establish data flow and communication protocols

2.2.3. Detailed Design

- * Create detailed design documents (e.g., UML, sequence diagrams)
- * Define component interactions, API calls, and error handling
- * Develop implementation plans and timelines

2.3. Architecture Review and Approval

2.3.1. Peer Review

- * Conduct regular peer reviews for architecture designs
- * Ensure compliance with organizational standards and principles
- * Provide constructive feedback and suggestions for improvement

2.3.2. Architecture Committee Approval

- * Establish an Architecture Committee to review and approve designs
- * Ensure that approved designs align with organizational goals and objectives
- * Document approval decisions and rationale

3. Compliance Monitoring, Penalties, and Operational Governance

3.1. Compliance Monitoring

- * Regularly monitor architecture designs for compliance with organizational standards and principles
- * Identify and address non-compliance issues promptly
- * Provide training and support to ensure awareness and adherence to architectural guidelines

3.2. Penalties for Non-Compliance

- * Failure to comply with architectural guidelines may result in:
 - + Re-work or re-design of the affected area
 - + Delayed project timelines or scope adjustments
 - + Additional training or education requirements
 - + Disciplinary actions, up to and including termination

3.3. Operational Governance

3.3.1. Architecture Committee Responsibilities

- * Oversee architecture design and implementation
- * Ensure compliance with organizational standards and principles
- * Provide guidance and support for architectural-related activities

3.3.2. Architecture Department Roles and Responsibilities

- * Develop and maintain architecture guidelines, standards, and procedures
- * Provide training and support for architecture-related activities
- * Collaborate with other departments to ensure alignment and consistency
