

Architecture Reference Document: TECH-ARCH-7325

Department: Architecture

Author: Angela Butler

Effective Date: 2020-05-01

Document Purpose:

This document outlines the core policies, standard operating procedures, and governance framework for the Architecture department.

Executive Summary:

The Architecture department is responsible for designing and implementing technology solutions that align with business objectives.

1. Document Scope and Executive Summary

Scope:

This document applies to all architects, designers, and stakeholders involved in the Architecture department's projects and initiatives.

Objectives:

The objectives of this document are:

- * To establish a clear understanding of architecture principles, policies, and procedures
- * To provide guidelines for designing and implementing technology solutions
- * To ensure compliance with organizational standards and regulatory requirements

2. Core Policies and Standard Operating Procedures

Policy 1: Architecture Design Principles

The Architecture department will adhere to the following design principles:

- * Scalability: Designs must be scalable to accommodate future growth and changing business needs.
- * Security: Designs must prioritize security, ensuring the confidentiality, integrity, and availability of data.
- * Interoperability: Designs must ensure seamless integration with existing systems and technologies.
- * Usability: Designs must prioritize user experience and ease of use.

Procedure 1: Architecture Design Process

The architecture design process will follow these steps:

1. Requirements gathering: Gather project requirements from stakeholders.
2. Concept development: Develop high-level concepts for the solution.
3. Design creation: Create detailed designs, including system architecture, data flows, and user interfaces.
4. Review and iteration: Conduct reviews and iterate on the design until it meets requirements.
5. Implementation: Implement the designed solution.

Procedure 2: Change Management

The Architecture department will follow a change management process to ensure that changes are properly assessed, approved, and implemented.

1. Request submission: Submit requests for changes to the architecture environment.
2. Review and assessment: Conduct reviews and assessments of the requested changes.
3. Approval: Obtain approval from the relevant stakeholders.
4. Implementation: Implement the approved changes.

3. Compliance Monitoring, Penalties, and Operational Governance

Compliance Monitoring:

The Architecture department will monitor compliance with this document through regular audits, reviews, and reporting.

Penalties:

In the event of non-compliance, penalties may include:

- * Formal written warnings
- * Suspension or termination of architecture privileges
- * Mandatory training or education

Operational Governance:

The Architecture department will operate within the following governance framework:

1. Decision-making authority: The Architecture department will make decisions regarding technology solutions and architecture p
2. Communication: Regular communication with stakeholders, management, and other departments is essential.
3. Reporting: The Architecture department will provide regular reports on its activities, progress, and compliance.

Review and Revision:

This document will be reviewed and revised annually, or as needed, to ensure it remains relevant and effective.
