

TECH-ARCH-7332: Architecture Reference Document

Metadata

- * Document ID: TECH-ARCH-7332
- * Department: Architecture
- * Author: John Carter
- * Effective Date: 2020-09-01

1. Document Scope and Executive Summary

This document outlines the scope, policies, procedures, and governance framework for the Architecture department at [Company Name].

The scope includes:

- * Defining architecture principles, standards, and guidelines
- * Establishing roles and responsibilities for architects and stakeholders
- * Outlining procedures for design, development, testing, and deployment of architectures
- * Describing compliance monitoring, penalties, and operational governance

2. Core Policies and Standard Operating Procedures

2.1 Architecture Principles

The Architecture department will adhere to the following principles:

- * **Separation of Concerns**: Designs will be modularized to isolate concerns, promoting maintainability and scalability.
- * **Modularity**: Architectures will prioritize modularity, enabling components to be developed, tested, and deployed independently.
- * **Reusability**: Components will be designed for reusability, reducing duplication and improving overall efficiency.
- * **Security**: Architectures will prioritize security, ensuring data confidentiality, integrity, and availability.

2.2 Design and Development Process

- Architecture Definition**: Architects will define high-level architecture designs, considering business requirements, technical constraints, and future scalability.
- Design Documents**: Detailed design documents will be created, outlining system components, interfaces, and interactions.
- Implementation**: Developers will implement architectures according to design specifications.
- Testing and Validation**: Testing and validation procedures will ensure compliance with architecture specifications.

2.3 Change Management

- Request for Changes**: Stakeholders will submit change requests in writing, outlining the proposed changes and their expected impact.
- Review and Approval**: The Architecture department will review and approve change requests, ensuring alignment with architectural principles and standards.
- Implementation**: Approved changes will be implemented according to established procedures.

2.4 Compliance Monitoring

- Regular Audits**: Regular audits will be conducted to ensure compliance with architecture principles, standards, and guidelines.
- Penalties for Non-Compliance**: Non-compliant architectures will be subject to penalties, including but not limited to:
 - * Re-design or re-development
 - * Loss of privileges or access

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The Architecture department will conduct regular audits to ensure compliance with architecture principles, standards, and guidelines.

3.2 Penalties for Non-Compliance

Penalties for non-compliance will be enforced as outlined in Section 2.4, including but not limited to:

- * Re-design or re-development
- * Loss of privileges or access

3.3 Operational Governance

1. **Architecture Committee**: The Architecture department will establish an architecture committee to oversee architectural design and development.
2. **Stakeholder Communication**: Stakeholders will be informed of architecture changes, updates, and compliance status.

By following this document, the Architecture department will maintain a standardized approach to architectural design, development, and deployment.
