

Document ID: TECH-ARCH-7597

Department: Architecture

Author: Adam Salazar

Effective Date: 2021-05-24

1. Document Scope and Executive Summary

This document outlines the core policies, standard operating procedures, and guidelines for the Architecture department within c

The scope of this document includes:

- * Defining the role and responsibilities of architects
- * Outlining the design process and review procedures
- * Establishing guidelines for documentation, version control, and knowledge sharing
- * Describing the architecture review board (ARB) and its role in ensuring quality and consistency

2. Core Policies and Standard Operating Procedures

2.1 Design Principles

The Architecture department is committed to delivering designs that are:

- * Scalable: Designs must be able to accommodate future growth and changes.
- * Secure: Designs must prioritize security and minimize potential vulnerabilities.
- * Usable: Designs must be intuitive, easy to use, and provide a positive user experience.

2.2 Design Process

The design process consists of the following stages:

1. Conceptualization: Architects will develop initial concepts and ideas based on project requirements and stakeholder input.
2. Prototyping: Architects will create prototypes or mockups to test and refine designs.
3. Review and Revision: Designs will be reviewed by peers, stakeholders, and the ARB for quality, consistency, and compliance.
4. Implementation: Approved designs will be implemented according to established procedures.

2.3 Documentation and Version Control

Architects are responsible for maintaining accurate and up-to-date documentation of their work, including:

- * Design specifications
- * Prototypes or mockups
- * Test plans and results
- * Change logs

Version control systems (VCS) will be used to track changes and maintain a record of all design iterations.

2.4 Knowledge Sharing and Collaboration

Architects are expected to share their knowledge, expertise, and designs with colleagues through:

- * Regular meetings and discussions

- * Documented design decisions and rationales
- * Collaborative tools and platforms (e.g., version control systems, project management software)

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The Architecture department will monitor compliance with this document through:

- * Regular review of designs and documentation
- * Peer-to-peer feedback and assessment
- * Annual audits or self-assessments

3.2 Penalties for Non-Compliance

In the event of non-compliance, architects may face penalties, including:

- * Verbal warnings
- * Written warnings
- * Suspension or termination of design responsibilities
- * Mandatory training or workshops to address knowledge gaps

3.3 Operational Governance

The Architecture department will maintain a governance structure to ensure efficient and effective operations, including:

- * Architecture review board (ARB)
- * Design lead or manager
- * Stakeholder engagement and communication plan

By following this reference document, architects can ensure that their work meets the highest standards of quality, consistency,
