

ARCHITECTURE REFERENCE DOCUMENT: TECH-ARCH-7882

****Document ID:** TECH-ARCH-7882**

****Department:** Architecture**

****Author:** Elaine Young**

****Effective Date:** 2025-11-02**

1. Document Scope and Executive Summary

This Architecture Reference Document (ARD) outlines the core policies, standard operating procedures, and best practices for the Architecture department.

The purpose of this document is to:

- * Establish clear guidelines for architecture-related activities
- * Define roles and responsibilities within the Architecture department
- * Provide a framework for decision-making and problem-solving
- * Ensure compliance with relevant company policies and industry standards

2. Core Policies and Standard Operating Procedures

2.1 Architecture Design Principles

The Architecture department follows the following design principles:

- * Separation of Concerns: Components are designed to perform specific functions, reducing complexity and improving maintainability.
- * Modularity: Systems are composed of independent, interchangeable modules that can be easily updated or replaced.
- * Scalability: Architectures are designed to accommodate growth and changing requirements.
- * Flexibility: Systems are designed to adapt to changing business needs and technologies.

2.2 Architecture Review Process

The Architecture Review Process (ARP) is a formalized process for reviewing and approving architecture designs. The ARP involves the following steps:

1. Request for Architecture Design (RAD): A request is submitted by the project manager or architect to initiate an architecture design.
2. Architecture Design Document: The requesting party submits a comprehensive architecture design document, including system requirements, design options, and a proposed architecture.
3. Review Committee: A review committee consisting of architects, engineers, and subject matter experts reviews the architecture design document.
4. Revisions and Feedback: The reviewing committee provides feedback and suggestions for revisions to the architecture design document.
5. Final Approval: The revised architecture design document is submitted for final approval by the Architecture department.

2.3 Change Management Process

The Change Management Process (CMP) outlines the procedures for requesting, evaluating, and implementing changes to existing architecture designs. The CMP involves the following steps:

1. Request for Change: A request is submitted to initiate a change to an existing architecture.
2. Impact Analysis: An impact analysis is conducted to assess the potential effects of the proposed change on the system, stakeholders, and existing architecture.
3. Review Committee: A review committee consisting of architects, engineers, and subject matter experts reviews the proposal for change.
4. Revisions and Feedback: The reviewing committee provides feedback and suggestions for revisions to the proposal.
5. Final Approval: The revised proposal is submitted for final approval by the Architecture department.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The Architecture department is responsible for monitoring compliance with company policies, industry standards, and regulatory

3.2 Penalties and Corrective Actions

In the event of non-compliance, the Architecture department will take corrective actions, which may include:

- * Re-training or re-certification of architects
- * Review and revision of architecture designs
- * Imposition of penalties, such as project delays or budget reallocation

3.3 Operational Governance

The Architecture department is responsible for governing the operations of the department, including:

- * Resource allocation and management
- * Communication and collaboration with other departments
- * Budgeting and financial planning
- * Performance metrics and evaluation
