

TEH-ARCH-7900: Architecture Reference Document

Document Metadata:

Document ID: TECH-ARCH-7900

Department: Architecture

Author: Nicole Holt

Effective Date: 2020-12-07

1. Document Scope and Executive Summary

This document outlines the core policies, standard operating procedures (SOPs), and compliance monitoring guidelines for the Architecture department.

The scope of this document includes:

- * Defining the roles and responsibilities of architecture team members
- * Establishing core policies and SOPs for architectural design, development, and testing
- * Outlining compliance monitoring procedures to ensure adherence to industry standards and company policies
- * Providing guidelines for operational governance and issue resolution

2. Core Policies and Standard Operating Procedures

2.1 Architectural Design Guidelines

The Architecture department shall adhere to the following design guidelines:

- * All architectural designs must comply with company branding guidelines and visual identity standards
- * Designs must be functional, aesthetically pleasing, and scalable for future growth
- * Technical requirements and specifications must be clearly documented and communicated to stakeholders

2.2 Development and Testing Procedures

The Architecture department shall follow the following development and testing procedures:

- * All architectural designs must undergo a thorough review and approval process before implementation
- * Design changes must be thoroughly tested and validated before deployment
- * The Architecture team is responsible for ensuring that all design elements are properly integrated and functional

2.3 Collaboration and Communication Guidelines

The Architecture department shall adhere to the following collaboration and communication guidelines:

- * Architects must maintain open lines of communication with stakeholders, including project managers, developers, and other teams
- * Regular status updates and progress reports must be provided to stakeholders
- * The Architecture team is responsible for ensuring that all design elements are properly coordinated and integrated

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring Procedures

The Architecture department shall monitor compliance with the following procedures:

- * Regular audits and reviews of architectural designs and implementations
- * Tracking and reporting of design-related issues and incidents
- * Identification and mitigation of potential risks and vulnerabilities

3.2 Penalties for Non-Compliance

Non-compliance with the policies, SOPs, and guidelines outlined in this document may result in penalties, including:

- * Reprimand or written warning
- * Suspension or termination of architectural design responsibilities
- * Mandatory training or professional development requirements

3.3 Operational Governance and Issue Resolution

The Architecture department shall follow the following operational governance and issue resolution procedures:

- * The Architecture team is responsible for ensuring that all design elements are properly integrated and functional
- * Design-related issues must be reported and escalated to management in a timely manner
- * The Architecture team must maintain accurate and up-to-date records of design-related incidents and resolutions
