

TECH-ARCH-8319: Architecture Reference Document

Metadata:

Document ID: TECH-ARCH-8319

Department: Architecture

Author: Amanda Walsh

Effective Date: 2020-08-07

1. Document Scope and Executive Summary

This document outlines the core policies, standard operating procedures (SOPs), and governance framework for the Architecture

Executive Summary:

The Architecture department is responsible for designing, developing, and maintaining the organization's technical infrastructure

2. Core Policies and Standard Operating Procedures

2.1. Design Principles

- * Adhere to the organization's technology stack and infrastructure standards.
- * Prioritize scalability, maintainability, and security in design decisions.
- * Ensure architectural designs are aligned with business objectives and strategic initiatives.

2.2. Requirements Gathering and Analysis

- * Utilize standardized templates for capturing requirements and use cases.
- * Conduct thorough analysis of business needs and stakeholders' expectations.
- * Develop clear and concise technical specifications for each project.

2.3. Design and Development

- * Follow the organization's coding standards, best practices, and guidelines.
- * Collaborate with cross-functional teams to ensure seamless integration with other systems.
- * Conduct regular code reviews and testing to ensure high-quality deliverables.

2.4. Testing and Quality Assurance

- * Develop comprehensive test plans and cases for each project.
- * Perform thorough testing of all aspects of the architecture, including scalability, performance, and security.
- * Collaborate with QA teams to ensure that architectural designs meet quality standards.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1. Compliance Monitoring

- * Conduct regular audits and reviews of architectural designs against organizational policies and standards.
- * Monitor compliance with relevant regulations, such as data protection and security laws.
- * Identify and address any non-compliance issues promptly.

3.2. Penalties and Consequences

- * Failure to comply with organizational policies and standards may result in disciplinary action, up to and including termination of
- * Repeated instances of non-compliance may lead to revocation of architectural design authority.

3.3. Operational Governance

- * Establish clear roles and responsibilities for architects, project managers, and other stakeholders involved in architecture-relate

- * Develop and maintain a centralized architecture repository to track changes, updates, and status.
- * Conduct regular review and approval processes for architectural designs to ensure alignment with organizational objectives.
