

TECH-ARCH-8328: Architecture Reference Document

Department: Architecture

Author: Mary Stevens

Effective Date: 2021-11-25

1. Document Scope and Executive Summary

This document serves as a comprehensive reference for the Architecture department, outlining core policies, standard operating

The scope of this document includes:

- * Defining architectural principles and standards
- * Establishing SOPs for architecture design, development, and testing
- * Outlining compliance monitoring and penalties
- * Providing operational governance and best practices

This document is intended to provide a centralized reference point for all architecture-related activities, ensuring consistency, qu

2. Core Policies and Standard Operating Procedures

2.1 Architecture Design Principles

Our architecture design principles are as follows:

- * Scalability: Designs should be scalable to accommodate growth and changes
- * Flexibility: Designs should allow for flexibility in terms of technology and innovation
- * Security: Designs should prioritize security and minimize risk
- * Maintainability: Designs should prioritize maintainability and ease of updates
- * Usability: Designs should prioritize usability and user experience

2.2 Architecture Design Process

Our architecture design process includes the following stages:

1. Requirements gathering
2. High-level design
3. Detailed design
4. Testing and validation
5. Implementation and deployment

2.3 Architecture Review and Approval

All architecture designs must undergo a review and approval process, which includes:

- * Peer review by fellow architects
- * Technical review by relevant technical leads
- * Business review by stakeholders and business owners
- * Final approval by the Architecture Lead or designated representative

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The Architecture department will maintain a centralized repository of all architecture designs, ensuring compliance with organizational standards.

3.2 Penalties for Non-Compliance

In the event of non-compliance with architectural principles or standard operating procedures, the following penalties may apply:

- * Re-design and re-testing of the affected architecture component
- * Suspension or termination of privileges to design and implement architectures
- * Mandatory training or education on architectural principles and SOPs

3.3 Operational Governance

The Architecture department will maintain a governance framework that includes:

- * Clear roles and responsibilities for architects, technical leads, and stakeholders
- * Regular meetings and status updates
- * Escalation procedures for issues and concerns
- * Continuous improvement and feedback mechanisms
