- * Department: Architecture
- * Author: Gavin White
- * Effective Date: 2020-10-04

1. Document Scope and Executive Summary

This reference document outlines the core policies, standard operating procedures (SOPs), and guidelines for the Architecture o

The scope of this document includes:

- * Defining the roles and responsibilities of architects and other stakeholders
- * Establishing guidelines for architecture project management, including scope, schedule, budget, and quality control
- * Outlining procedures for design, development, testing, and deployment of architectural solutions
- * Describing compliance monitoring, penalties, and operational governance measures

2. Core Policies and Standard Operating Procedures

2.1 Architecture Project Management

- * ****Scope****: Define project scope, goals, and objectives in collaboration with stakeholders
- * ****Schedule****: Establish a project schedule, including milestones and deadlines
- * ****Budget****: Determine the project budget, including resource allocation and expense tracking
- * ****Quality Control****: Conduct regular quality assurance reviews to ensure compliance with architecture standards and best practices

2.2 Design and Development

- * ****Design Principles****: Adhere to company-approved design principles, including scalability, maintainability, and security considerations
- * ****Development Standards****: Use approved development tools, frameworks, and languages in accordance with company standards
- * ****Testing and Validation****: Conduct thorough testing and validation of architectural solutions to ensure quality and reliability

2.3 Communication and Collaboration

- * ****Stakeholder Management****: Identify and engage key stakeholders, including project sponsors, customers, and team members
- * ****Communication Channels****: Establish clear communication channels, including regular meetings, email updates, and collaboration tools
- * ****Collaboration Tools****: Utilize approved collaboration tools, such as version control systems, issue tracking software, and project management software

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

- * ****Audit and Review****: Conduct regular audits and reviews of architecture projects to ensure compliance with company policies
- * ****Risk Assessment****: Identify and assess potential risks associated with architecture projects, including technical, financial, and operational risks

3.2 Penalties and Corrective Actions

- * ****Non-Compliance****: Address non-compliance issues promptly, including notification of project sponsors, customers, and other stakeholders
- * ****Corrective Actions****: Implement corrective actions to address non-compliance issues, including rework, retraining, or process improvements

3.3 Operational Governance

- * **Architecture Committee***: Establish an architecture committee to oversee the development and maintenance of company-wide architecture.
- * **Change Management***: Implement a change management process to ensure that changes to architecture projects are properly managed and approved.
