

TECH-ARCH-8968: Architecture Reference Document

Department: Architecture

Author: Karen Duncan

Effective Date: 2021-10-18

Architecture Reference Document: TECH-ARCH-8968

1. Document Scope and Executive Summary

This document serves as a comprehensive reference guide for the Architecture department, outlining core policies, standard operating procedures, and best practices.

The executive summary highlights the key objectives:

- * Establish standardized architecture practices across the organization
- * Ensure compliance with industry standards and regulations
- * Foster collaboration among architects and stakeholders

2. Core Policies and Standard Operating Procedures

2.1 Architecture Governance Framework

The architecture governance framework outlines the roles, responsibilities, and decision-making processes for the Architecture department.

- * Architecture Board: A cross-functional committee responsible for reviewing and approving architectural decisions.
- * Architectural Decision-Making Process: A structured approach for evaluating and resolving architectural conflicts.

2.2 Code of Conduct

The code of conduct outlines expected behavior, professional ethics, and standards for architects working within the organization.

- * Respect for colleagues and stakeholders
- * Confidentiality and non-disclosure agreements
- * Professional development and continuous learning

2.3 Architecture Standards and Best Practices

This section outlines the organization's architecture standards and best practices, including:

- * Technology stack and infrastructure guidelines
- * Security and compliance requirements
- * Data modeling and data governance principles

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The Architecture department will maintain a compliance monitoring program to ensure adherence to the policies and procedures.

- * Regular audits and assessments
- * Performance metrics and key performance indicators (KPIs)
- * Continuous improvement initiatives

3.2 Penalties and Corrective Actions

In the event of non-compliance, the Architecture department will implement penalties and corrective actions, including:

- * Verbal warnings and written reprimands
- * Temporary or permanent suspension of architecture responsibilities
- * Mandatory training and professional development programs

3.3 Operational Governance

The Architecture department will maintain a structured approach to operational governance, including:

- * Project management methodologies (e.g., Agile, Waterfall)
- * Change management processes
- * Issue tracking and resolution procedures
