

TECH-ARCH-8981: Architecture Reference Document

Document Metadata

- * Document ID: TECH-ARCH-8981
- * Department: Architecture
- * Author: Katherine Woodward
- * Effective Date: 2024-01-09

1. Document Scope and Executive Summary

This Architecture Reference Document outlines the core policies, standard operating procedures, and best practices for the Architecture department.

The scope of this document includes:

- * Overview of architecture principles and standards
- * Guidelines for system and application design
- * Procedures for creating and maintaining architectural designs
- * Roles and responsibilities of architects and other stakeholders

This document is intended to serve as a reference guide for all employees involved in the Architecture department, as well as external stakeholders.

2. Core Policies and Standard Operating Procedures

2.1 Architecture Principles

The following architecture principles will be used as guidelines for designing and developing our company's products and services.

- * Separation of Concerns (SoC)
- * Single Responsibility Principle (SRP)
- * Don't Repeat Yourself (DRY)
- * KISS (Keep it Simple, Stupid)

2.2 System and Application Design

The following design principles will be used for system and application design:

- * Use a layered architecture to separate concerns
- * Implement a scalable and flexible architecture
- * Use a microservices-based approach where applicable
- * Ensure data consistency and integrity

2.3 Creating and Maintaining Architectural Designs

The following procedures will be followed when creating and maintaining architectural designs:

- * Create a clear and concise design document that includes:
 - + Architecture overview
 - + System and application architecture diagrams
 - + Technical requirements and constraints
 - + Design decisions and rationales
- * Conduct regular code reviews to ensure adherence to the design principles and standards
- * Maintain a centralized repository of architectural designs and documentation

2.4 Roles and Responsibilities

The following roles and responsibilities will be assigned:

- * Architecture Lead: Responsible for overseeing the architecture process, providing guidance and mentorship, and ensuring compliance.
- * Architects: Responsible for designing and developing our company's products and services in accordance with this document.
- * Designers: Responsible for creating and maintaining architectural designs and documentation.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The Architecture department will be responsible for monitoring compliance with this document. This includes:

- * Conducting regular audits to ensure adherence to the design principles and standards
- * Providing training and guidance to architects and designers on best practices and procedures
- * Identifying and addressing any gaps or inconsistencies in the architecture process

3.2 Penalties

In the event of non-compliance with this document, the following penalties will be applied:

- * First-time offenders: Verbal warning
- * Repeat offenders: Written warning
- * Failure to comply with multiple instances: Suspension or termination of employment

3.3 Operational Governance

The Architecture department will operate in accordance with the following governance model:

- * Decision-making authority: The Architecture Lead and Architects will have decision-making authority for architecture-related matters.
- * Communication channels: The Architecture department will maintain open communication channels with other departments, stakeholders, and customers.
- * Change management process: The Architecture department will follow a change management process to ensure that changes are implemented in a controlled and documented manner.

By following this document, we can ensure that our company's products and services are designed and developed in accordance with our architectural principles and standards.
