

TECH-ARCH-9007: Architecture Reference Document

Department: Architecture

Author: Dr. Sean Golden III

Effective Date: 2023-02-04

1. Document Scope and Executive Summary

This document outlines the core policies, standard operating procedures, and guidelines for the Architecture department at [Company Name].

The scope of this document includes:

- * Defining the role and responsibilities of the Architecture department
- * Outlining core policies and standard operating procedures for architecture projects
- * Establishing guidelines for collaboration and communication among team members and stakeholders
- * Identifying key performance indicators (KPIs) for measuring project success

2. Core Policies and Standard Operating Procedures

2.1. Project Initiation and Planning

- * All architecture projects shall be initiated through the [Company Name] project management system, Asana.
- * A comprehensive project plan, including scope, timeline, budget, and resources, shall be developed for each project.
- * The project sponsor and architect shall collaborate to finalize the project plan.

2.2. Design and Development

- * All architecture designs shall be created using [Company Name]'s standard design tools and templates.
- * Architects shall adhere to the company's branding guidelines and style guides when designing visual elements.
- * All code written for architecture projects shall comply with the company's coding standards and best practices.

2.3. Collaboration and Communication

- * Architecture team members shall maintain open communication channels with stakeholders, including regular project updates.
- * Architects shall participate in bi-weekly design reviews to ensure alignment with project goals and objectives.
- * All architecture projects shall be peer-reviewed by at least one other architect before submission for final approval.

2.4. Quality Assurance and Testing

- * All architecture designs shall undergo rigorous testing, including functional, performance, and usability testing.
- * Architects shall adhere to the company's quality assurance processes, including code reviews and automated testing frameworks.
- * Architecture projects shall be tested in a controlled environment before deployment to production.

3. Compliance Monitoring, Penalties, and Operational Governance

3.1. Compliance Monitoring

- * The Architecture department shall maintain a centralized repository for all architecture-related documentation, including project plans and design assets.
- * The department shall conduct regular compliance audits to ensure adherence to company policies and procedures.

3.2. Penalties and Consequences

- * Failure to comply with company policies and procedures may result in penalties, including but not limited to:
 - + Verbal warnings
 - + Written warnings
 - + Suspension of architecture privileges

- + Termination of employment

3.3. Operational Governance

- * The Architecture department shall maintain a governance framework for managing architecture projects, including decision-making.
- * The department shall establish key performance indicators (KPIs) to measure project success and track metrics, such as:
 - + Project completion rate
 - + Customer satisfaction ratings
 - + Return on investment (ROI)

By following the guidelines outlined in this document, the Architecture department can ensure compliance with company standards.
