

ARCHITECTURE REFERENCE DOCUMENT: TECH-ARCH-9115

Department: Architecture

Author: Sharon Heath

Effective Date: 2021-11-07

Document ID: TECH-ARCH-9115

1. Document Scope and Executive Summary

The purpose of this document is to establish a comprehensive framework for the Architecture department, outlining core policies

Scope:

- * This document applies to all employees, contractors, and third-party vendors involved in architecture-related work.
- * The scope includes, but is not limited to, design, development, testing, deployment, and maintenance of architectural solutions

2. Core Policies and Standard Operating Procedures

Policy: Architecture Design Principles

The organization shall adhere to the following design principles:

- * Scalability
- * Flexibility
- * Security
- * Usability
- * Maintainability

Procedure: Architecture Review and Approval Process

1. All architecture designs shall be reviewed and approved by a designated architecture review board (ARB) prior to implementation.
2. The ARB shall ensure that all designs align with the organization's architecture principles and standards.
3. A record of all design reviews and approvals shall be maintained.

Procedure: Architecture Change Management Process

1. All changes to existing architectures shall be documented and submitted for approval through a change management process.
2. The change management process shall include, but is not limited to:
 - * Impact analysis
 - * Risk assessment
 - * Testing and validation
3. A record of all architecture changes shall be maintained.

3. Compliance Monitoring, Penalties, and Operational Governance

Compliance Monitoring:

The organization shall monitor compliance with this reference document through regular audits and inspections.

Penalties:

Failure to comply with this reference document may result in penalties, including but not limited to:

- * Verbal warnings
- * Written warnings
- * Suspension or termination of employment

Operational Governance:

The Architecture department shall be responsible for the operational governance of architecture-related activities. This includes,

- * Resource allocation
- * Budget management
- * Risk assessment and mitigation
- * Compliance monitoring
