

TECH-ARCH-9750: Architecture Reference Document

Department: Architecture

Author: Alexandra Dominguez

Effective Date: 2022-06-03

1. Document Scope and Executive Summary

This document outlines the critical policies and standard operating procedures for the Architecture department at [Company Name].

The scope of this document includes:

- * Defining the Architecture department's mission and vision
- * Describing the roles and responsibilities of architecture team members
- * Outlining the standard operating procedures for architectural design and development
- * Establishing compliance monitoring, penalties, and operational governance

By following the guidelines outlined in this document, the Architecture department will ensure that its activities are aligned with company goals and standards.

2. Core Policies and Standard Operating Procedures

2.1 Architectural Design Guidelines

The Architecture department shall adhere to the following design guidelines:

- * All architectural designs must be created using [approved software tools]
- * Designs must comply with [company-wide] accessibility standards
- * Designs must incorporate [industry-standard] best practices for security, scalability, and maintainability

2.2 Development Process

The Architecture department shall follow the below development process:

1. **Requirements Gathering**: Identify project requirements through collaboration with stakeholders and subject matter experts.
2. **Design**: Develop architectural designs based on gathered requirements using approved design tools.
3. **Implementation**: Implement designed solutions using [approved programming languages] and frameworks.
4. **Testing**: Conduct thorough testing to ensure compliance with design specifications and company standards.
5. **Deployment**: Deploy implemented solutions to production environments after successful testing.

2.3 Code Review and Quality Assurance

The Architecture department shall perform code reviews and quality assurance activities as follows:

- * All code must be reviewed by at least one other team member before deployment
- * Code reviews shall focus on adherence to design guidelines, security, scalability, and maintainability
- * Quality assurance testing shall include unit testing, integration testing, and regression testing

3. Compliance Monitoring, Penalties, and Operational Governance

3.1 Compliance Monitoring

The Architecture department shall conduct regular compliance monitoring activities to ensure adherence to company standards, policies, and regulations.

- * **Frequency**: Compliance monitoring shall be conducted monthly for high-risk projects and quarterly for low-risk projects.

* **Scope**: Compliance monitoring shall cover all aspects of architectural design and development, including code reviews, tes

3.2 Penalties

The Architecture department shall impose penalties for non-compliance with company standards, industry best practices, and re

* **Warning**: First-time offenders shall receive a written warning.

* **Suspension**: Repeat offenders shall be suspended from participating in architectural design and development activities for a

* **Termination**: Failure to comply with repeated warnings or suspensions shall result in termination of employment.
